E-Ticket Sample

This sample shows the presentment of a travel document.

The document consists of
- a cover page (this one)
- itinerary information, reference and date and a repeating group of flight info
- a customs page
- a medical information page
- accommodation information, guest info and a repeating group of hotel info
- a boarding pass for each flight.

This sample demonstrates the creation of a dynamic document with portions printed in **Landscape** orientation and portions printed in **Portrait** orientation.

This sample also demonstrates the use of ***binding strips*** along certain page edges which work nicely with a Hewlett Packard® BindJet printer. The density of toner in the strip determines the degree of bind.

Information presented in **Red** provides an explanation of how this sample works.

Data field values that are bolded are global values and are likely utilized on multiple pages.

This cover page is produced using a full page subform [COVERPAGE] on a portrait foundation page [JFMAINPORT]. The triggering event is the field event !FldNotAvail for REFERENCE_NUMBER.

The data is structured in groups - REFERENCE, ISSUE, FLIGHT, CUSTOMS, MEDICAL, ACCOMODATIONS, HOTEL, TICKET.

The Custom Property [JFPREAMBLE] contains valuable information about this solution.

Description: Sydney Australia to Auckland New Zealand
Flight: 6534
Departs: 1:45 PM **Arrives:** 8:55 PM

Airline: South Pacific Airlines
Date: 12/12/2001
Gate: N/A **Terminal:** N/A

This subform [FLIGHT] is invoked by the presence of the field LEG_DESC in the data stream as a !FdNotAvail or !FldUsed event.

E-Ticket Itinerary

ET7514800

This subform [ITINERARY] is a heading for the page and contains a global field (bar code). It is activated as part of the !BOF event for group FLIGHT. This header subform will appear on all flight pages.

Issued By: Far Flights Travel

Issued Date: 10\26\2001

Reference Number: ET7514800

This subform [ISSUE] has the global attribute set for all fields. It will be triggered by a !FldNotAvail event associated with ISSUED_BY and as part of bottom of page (!BOF) for the flight subform.

Description: Auckland New Zealand to Los Angeles CA
Flight: 2391
Departs: 10:00 AM **Arrives:** 6:35 aM

Airline: South Pacific Airlines
Date: 12/27/2001
Gate: 34 **Terminal:** N/A

This subform [FLIGHT] is invoked by the presence of the field LEG_DESC in the data stream as a !FdNotAvail or !FldUsed event.

Description: Los Angeles CA to Chicago IL
Flight: 3445
Departs: 12:35 PM **Arrives:** 5:00 PM

Airline: AmerAir
Date: 12/28/2001
Gate: 27 **Terminal:** D

This subform [FLIGHT] is invoked by the presence of the field LEG_DESC in the data stream as a !FdNotAvail or !FldUsed event.

APHIS/FWS USE ONLY CUSTOMS USE ONLY

This full page subform [CUSTOMS] will be placed on a portrait foundation page [JFMAINPORT]. The triggering event is a !FldNotAvail event for field Birth_Date. The event triggers subform CUSTOMS that has a reserve attribute that in turn causes the !BOF event. The foundation page is invoked and a binding strip subform is placed along the left edge. This subform is then placed on the page.

WELCOME TO THE UNITED STATES

ap_etick - 20010624

Produced by Accelio Present Central 5.4

Medical Declaration

This full page subform [MEDICAL] will be placed on the foundation page - [JFMAINLAND] which is oriented in landscape mode. The triggering event is a !FldNotAvail for field HOME_ADDRESS_STREET. This subform is defined to always start a new page - giving us one per page. This setting is reflected as a Reserve clause on the group which reserves the whole page - causing a !BOF event and a new page to be started.

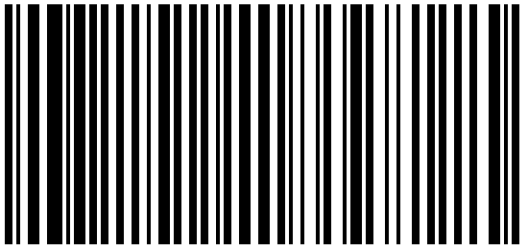
E-Ticket Boarding Pass

Passenger Terry **Mustard**	**Flight Date** 12/28/2001
Frequent Flyer Number DD27872	**Flight** AmerAir 3445
From Los Angeles CA	**Departure Time** 12:35 PM
Destination Chicago IL	**Gate** D-27 / **Seat** 4C / **Class** J

Thank you for choosing

Accelio

(00) 2 0011228 344504C



This header subform [BOARDING] will fit one to a page. The subform was defined as *always start a new page*. It represents a boarding pass. The subform will be placed on the foundation page JFMAINLAND - in a landscape orientation. The triggering mechanisms are the field events !FldNotAvail and !FldUsed associated with the first data element in the data group (Flight_date). The system generated field events cause a group event to fire. The group event has a reserve clause on it that reserves the whole page. This forces a !BOF event - thus activating a new page.
